

Care Instructions for Resin Jewellery and Crafts

Thank you for choosing our handmade resin jewellery and crafts!

To keep your pieces looking beautiful for years to come, please follow these care guidelines:

General Care

- **Avoid prolonged sunlight exposure:** UV rays can cause resin to yellow or fade over time.
 - **Keep away from heat sources:** High temperatures may soften or warp resin.
 - **Store properly:** Keep items in a cool, dry place, ideally in a soft pouch or box to prevent scratches.
-

Cleaning

- **Use a soft cloth:** Gently wipe with a microfibre or lint-free cloth to remove dust.
 - **Mild soap and water:** If needed, clean with lukewarm water and a drop of mild soap. Dry thoroughly.
 - **Avoid harsh chemicals:** Do not use alcohol, acetone, or abrasive cleaners—they can damage the resin surface.
-

Handling

- **Remove before activities:** Take off jewellery before swimming, showering, exercising, or applying lotions/perfume.
 - **Avoid impact:** Resin can chip or crack if dropped or knocked against hard surfaces.
-

Long-Term Care

- **Polishing:** If the surface becomes dull, you can gently polish with a resin-safe polish or a tiny amount of mineral oil.
 - **Repairs:** Contact us for advice if your piece becomes damaged—we may be able to help restore it.
-

Additional Tips for Online Buyers

- **Colour variations:** Each piece is handmade, so slight variations are normal and add to its uniqueness.
- **Shipping care:** Items are packaged securely, but please inspect upon arrival and let us know if there are any issues.
